

Data Day 2027 — “Suggest a Keynote” Form (BUILD SPEC)

Purpose: a short Microsoft Form for Champions (and staff) to surface keynote candidates for Data Day 2027. **Audience:** internal build guide — recreate this in Microsoft Forms. **Boundary:** Champions *scout and connect*; MORPC staff invite, vet, and negotiate. The form collects suggestions only — it makes no commitment to the speaker.

Form-level settings

- **Title:** Suggest a Keynote Speaker — Data Day 2027
- **Description (shown under the title):**

Help us find the voices that will headline Data Day 2027, our fifth annual gathering of Central Ohio's data community (Tuesday, February 16, 2027). Suggest someone whose work would inspire the room — a leader, practitioner, or storyteller working at the frontier of how the public sector uses data. You're a scout: just surface the name and why they'd be great. MORPC staff handle the invitation and the rest. Takes about 3 minutes.

- **Settings to enable:**
- *Record name* — automatically collect the respondent's name and email (Settings → “Record name”). This lets staff follow up, so name/email questions below are not needed for internal respondents. *If the form is shared outside the organization, turn this off and use Q1–Q2 below instead.*
- *One response per person:* off (a Champion may suggest more than once).
- *Accept responses:* on through **October 31, 2026** (keynotes finalize mid-November).
- **Shuffle questions:** off.

Questions

Keep it short — seven questions, two required. Question types in **[brackets]**.

Q1. Your name — [Short answer] — Required. (Only if external/anonymous link; otherwise covered by “Record name” above.)

Q2. Your email — [Short answer] — Required. Help text: So we can follow up if we have a question. (Only if external/anonymous link; otherwise covered by “Record name” above.)

Q3. Who are you suggesting? — [Short answer] — Required. Help text: Speaker’s full name.

Q4. Their role and organization — [Short answer] — Optional. Help text: Title and where they work, if you know it.

Q5. Why would they be a great Data Day keynote? — [Long answer] — Required. Help text: A sentence or two. What would they speak about, and why would it resonate with our data community?

Q6. A link, if you have one — [Short answer] — Optional. Help text: LinkedIn, a bio, or a talk you’ve seen — anything that helps us learn more.

Q7. Do you have a personal connection to them? — [Choice] — Required. Options: - No connection — just a strong suggestion - Yes — and I’d be glad to make a warm introduction (after checking they’re open to it) - Yes — but I’d prefer MORPC staff reach out directly

Confirmation message (shown after submit)

Thank you — your suggestion is in. MORPC staff review every name and handle the invitation and follow-up. If we move forward and you offered an introduction, we’ll reach out to coordinate. We appreciate you helping shape Data Day 2027.

Notes for staff

- **Routing:** suggestions feed the keynote shortlist owned by staff; the deliberative core makes the call. Log responses against the speaker tracking so two Champions don’t surface duplicates unnoticed.
- **Warm-intro path:** when Q7 = “I’d be glad to make a warm introduction,” staff send the Champion the warm-intro template before any contact — Champions check the candidate is open to it first.
- **Timing:** promote the form Aug–Oct; close it once the shortlist is set so it never collects suggestions that can’t be acted on.
